REGIONAL AIRPORT OPERATIONS AUDIT

TRANSFORMING REGIONAL AIRPORT MANAGEMENT, OPERATIONS, AND SYSTEMS

OPSAUDIT™
Aligning People, Process, Technology

Airport executives understand that market forces are exerting growing pressures to improve ever-changing and many times competing processes and operations. Expenses are rising faster than revenue, and the volatility and limited accessibility of useful information inhibits operational control. Business as usual is no longer an option.

A TIMELY SOLUTION TO A GROWING PROBLEM

OPSAUDIT™ is a formal operations and performance audit consisting of a detailed assessment, measurement, and analysis of airport operations. Designed to accommodate complexities of today's airport environment, **OPSAUDIT™** is conducted by professionals skilled in aerospace, aviation, business systems, and business process improvement. As a comprehensive operations and performance audit, **OPSAUDIT™** provides airport executives with an excellent tool to identify issues important to the airport's successful operation and growth.

Through **OPSAUDIT™**, airport executives are provided with a comprehensive review of key operations, internal controls, and processes. Strengths and weaknesses are exposed, and stakeholders receive practical real-world answers from which more accurate decisions, strategies, or operational improvements can be made.

■ COMPREHENSIVE FOUR-PHASE REVIEW

- Airport Systems
- Airport Facilities, Equipment, Inventory
- Operations, Business Systems, and Financial Management
- Public Administration and Planning

■ LINKING STRATEGY AND OPERATIONS

Operational and performance audits are proactive management tools. Consequently, airport executives are able to plan and measure financial performance, as well as evaluate organizational strengths and weaknesses.

- Interpret past performance
- Anticipate and plan future directions
- Measure present progress
- Demonstrate successes to airport authorities
- Control operations
- Uncover significant trends
- Compare results with industry standards
- Make key financial decisions
- Comply with governmental regulations
- Measure quality of service

Regional airports across the country are faced with growing fiscal constraints, increased marketplace demands, and disruptions caused by technological innovation. Business as usual will not reverse these trends.

At Aerospace Enterprises, we understand that an important first step toward improvement is a systemic assessment of airport operations, tactics, and strategies. Developed specifically for regional airport operations, OPSAUDIT™ is an innovative approach to improvement of regional airport operations.

When business as usual is no longer an option, we would like to hear from you. For information, contact us toll free at 440-835-1055 or visit our web site at www.aerospaceenterprises.com.
